

Mindomo - Making a Presentation

Mindomo also has presentation capabilities where staff or students can present their mind maps. The following steps will assist you after creating your mind map:

- Select "Presenter"
 

- Mindomo will select the your "Topic" as the slide #1
 

- Add slides by selecting the plus sign
 

- Or select slide to insert after different sections of your presentation

- Select "Shift" and drag over each section of your presentation. The first

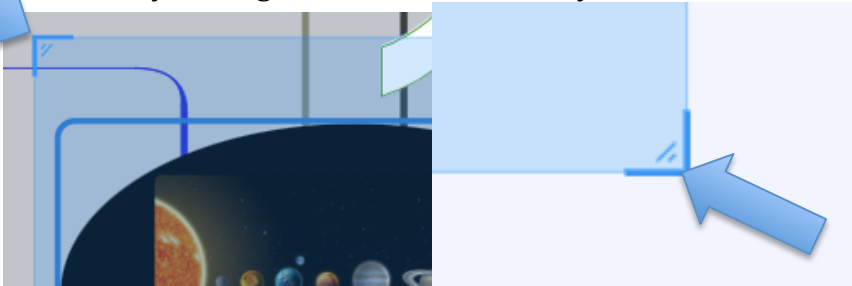

section you select will become #2

- Repeat first steps i.e. Select
 
 to select the next slide in the order you choose

Make sure you drag the corners to ensure you have the section that you isolated

You can also position slides in a different order by moving them down in the numbered positions.

- Hold the “Shift” key and drag the number up or down the row i.e. #10 can become #9 slide in your presentation.

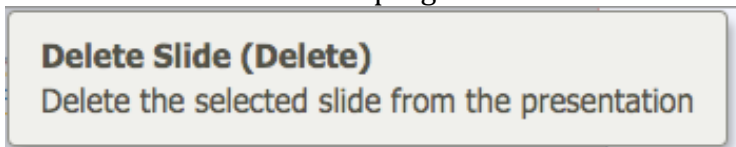

Adding or Removing Slides/Topics

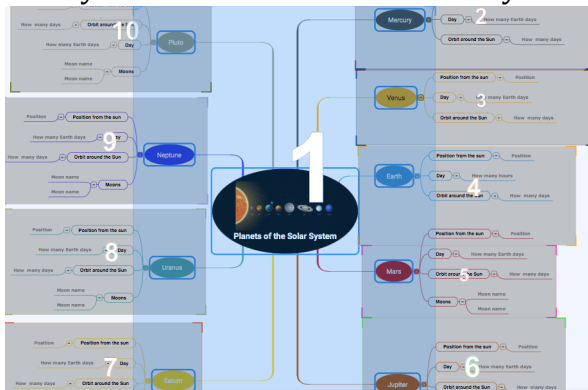

- Select the drop down arrow and “Delete slide”
- Select Add/Remove topics from slide or “Delete slide”

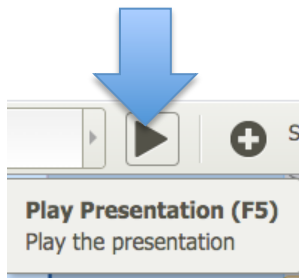

- Or select the trash at the top right

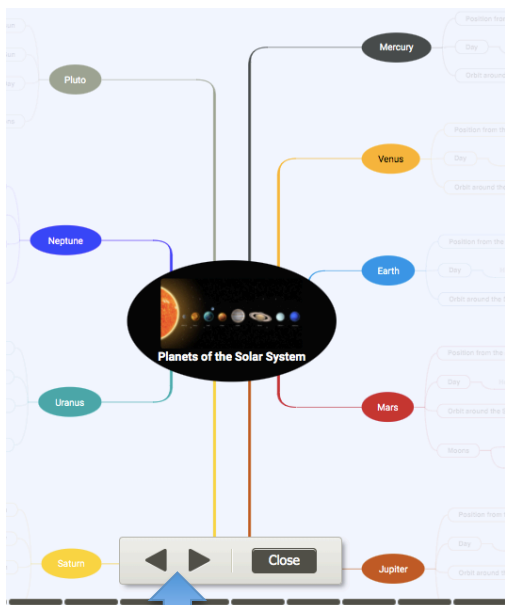

- Once your slides have been selected your Mindomo should look like this:

- Select “Play”
- Select the forward arrow or backward arrow to show your presentation.

- Each numbers section will show it in the order you chose.
- When you are finished presenting select “Close”.

- To close presentation mode

- Select the arrow at the top right hand side of the presentation
